

Atlantech Online

Description:

This project was a fit-out and expansion of Atlantech's existing space and data center. It was a full interior, high-end buildout which included an open ceiling concept with pendant light fixtures, metal wall accents, digital graphics, high-gloss aluminum frames, and glazing with accents paints. Some challenges of the project included working around a fully operational data center while renovating the interior of the space simultaneously.

Details:

Location:	Silver Spring, Maryland
Value:	6,800 Square Feet
Duration:	High-gloss framed glazing, LVT metal accents, data center renovation
Size:	The M Group
